INDEX OF VOLUME 1

Adelman, D. M. *Note on the arithmetic of bilinear transformations*, 443.
Ames, D. B. *Certain inversion formulas for the Laplace transform*, 99.
Amitsur, A. S., and Levitzki, J. *Minimal identities for algebras*, 449.
Ankeny, N. C., and Chowla, S. *The relation between the class number and the distribution of primes*, 775.
Bateman, P. T., and Chowla, S. *Averages of character sums*, 781.
Bell, J. H. *Families of solutions of the unilateral matrix equation*, 151.
—— *The solution of a unilateral direct product matrix equation*, 777.
Berger, A. *On disjoint sets of distribution functions*, 25.
Blankinship, W. A., and Fox, R. H. *Remarks on certain pathological open subsets of 3-space and their fundamental groups*, 618.
Boyer, J. M., and Hall, D. W. *A note on Peano spaces*, 231.
Breves Filho, J. A. *On the algebraic integrals of a system of differential equations of mechanics*, 498.
Brigham, N. A. *A general asymptotic formula for partition functions*, 182.
—— *On a certain weighted partition function*, 192.
Brown, B., and McCoy, N. H. *The maximal regular ideal of a ring*, 165.
Brunk, H. D. *Note on a theorem of Kakutani*, 409.
Calderón, A. P. *On theorems of M. Riesz and Zygmund*, 533.
Carruth, P. W. *Roots and factors of ordinals*, 470, 826.
Chow, W. L. *On the defining field of a divisor in an algebraic variety*, 797.
Chowla, S. See Ankeny, N. C., Bateman, P. T.
Coburn, N. *"Characteristic directions" in three-dimensional supersonic flows*, 241.
Coddington, E. A. *The classical existence theorem of nonlinear analytic differential equations*, 738.
Cohen, L. W., and Goffman, C. *On the metrization of uniform space*, 750.
Cohn, R. M. *The resistance of an electrical network*, 316.
Cowling, V. F. *Summability and analytic continuation*, 536.
Dietrich, V. E., and Rosenthal, A. *A remark about our note "Transcendence of factorial series with periodic coefficients,"* 825.
Dieudonné, J. *Natural homomorphisms in Banach spaces*, 54.
Duffin, R. J. *Nonlinear networks.* IV, 233.
—— *Representation of Fourier integrals as sums.* II, 250.
Dushnik, B. *Concerning a certain set of arrangements*, 788.
Dvoretzky, A. *Bounds for the coefficients of univalent functions*, 629.
Eberlein, W. F. *Banach-Hausdorff limits*, 662.
Erdös, P. *Some remarks on set theory*, 127.
Erdös, P., and Piranian, G. *Convergence fields of row-finite and row-infinite Toeplitz transformations*, 397.
Fejes Tóth, L. *Covering by dismembered convex discs*, 806.
Fine, N. J. *Proof of a theorem of Jacobi*, 666.
Fort, M. K. *A proof that the group of all homeomorphisms of the plane onto itself is locally arcwise connected*, 59.
Fox, R. H. See Blankinship, W. A.
Fuchs, L. *On primal ideals*, 1.
Fuchs, W. H. J. *On the "collective Hausdorff method,"* 66.
Fullerton, R. E. *On a semi-group of subsets of a linear space*, 440.
Fulton, C. M. *The non-Euclidean mirror*, 331.
Gale, D. *Compact sets of functions and function rings*, 303.

Garabedian, P. R. *A remark on the moduli of Riemann surfaces of genus* 2, 668.
Gleason, A. M. *Spaces with a compact Lie group of transformations*, 35, 826.
Goffman, C. *On Lebesgue's density theorem*, 384.
—— See Cohen, L. W.
Goss, R. N. *Center of flexure of a triangular beam*, 744.
Gotô, M. *Linear representations of topological groups*, 425.
Grosswald, E. *On a simple property of the derivatives of Legendre's polynomials*, 553.
Grove, V. G. *On the R_λ-associate of a line*, 20.
—— *A note on isothermal nets*, 595.
Hall, D. W. See Boyer, J. M.
Hall, M. *A basis for free Lie rings and higher commutators in free groups*, 575.
Harish-Chandra. *On the radical of a Lie algebra*, 14.
—— *On faithful representations of Lie groups*, 205.
Hartman, P., and Wintner, A. *On Euler transforms*, 394.
Hashimoto, J. See Nakayama, T.
Hayes, C. A., and Morse, A. P. *Some properties of annular blankets*, 107.
—— *Convexical blankets*, 719.
Helsel, R. G. *A note on convergence in area*, 23.
Henkin, L. *A problem on inverse mapping systems*, 224.
Herstein, I. N. *A proof of a conjecture of Vandiver*, 370.
—— *On a conjecture on simple groups*, 438.
Hirschman, I. I. *Proof of a conjecture of I. J. Schoenberg*, 63.
Hirschman, I. I., and Jenkins, J. A. *Note on a result of Levine and Lifschitz*, 390.
—— *On lacunary Dirichlet series*, 512.
Hlavatý, V. *Deformation theory of subspaces in a Riemann space*, 600.
Hochschild, G. *Note on maximal algebras*, 11.
Hopf, E. *A theorem on the accessibility of boundary parts of an open point set*, 76.
—— *On S. Bernstein's theorem on surfaces $z(x, y)$ of nonpositive curvature*, 80.
Hsiung, C. C. *A note of correction*, 824.
Hu, S. T. *On generalising the notion of fibre spaces to include the fibre bundles*, 756.
Ingram, R. E. *Some characters of the symmetric group*, 358.
Jacobson, A. W. *The Green's function for the rectangle obtained by the finite Fourier transformations*, 682.
Jacobson, N. *Some remarks on one-sided inverses*, 352.
Jenkins, J. A. See Hirschman, I. I.
Jenner, W. E. *The radical of a non-associative ring*, 348.
Kaplansky, I. *The Weierstrass theorem in fields with valuations*, 356.
Keesee, J. W. *Finitely-valued cohomology groups*, 418.
Klein, G. *A note on interpolation*, 695.
Kline, M. *A Bessel function expansion*, 543.
Koopman, B. O. *Necessary and sufficient conditions for Poisson's distribution*, 813.
Kuranishi, M. *On euclidean local groups satisfying certain conditions*, 372.
Lehner, J. *Proof of Ramanujan's partition congruence for the modulus* 11^3, 172.
Leipnik, R. B. *Note on preservation of measurability*, 694.
Lepson, B. *Certain best possible results in the theory of Schnirelmann density*, 592, 826.
LeVeque, W. J. *Note on a theorem of Koksma*, 380.
Levitzki, J. *A theorem on polynomial identities*, 334.
—— See Amitsur, A. S.
Liao, S. D. *Concerning the generators of homotopy groups of a polyhedron*, 763.
McCoy, N. H. See Brown, B.

McShane, E. J. *Linear functionals on certain Banach spaces*, 402.
Marden, M. *On the polynomial solutions of the generalized Lamé differential equation*, 492.
Mathis, H. F. *A theorem on the extension of a rectangular matrix of continuous functions to become a nonsingular square matrix*, 344.
Mautner, F. I. *Infinite-dimensional irreducible representations of certain groups*, 582.
Mickle, E. J. *A remark on a theorem of Serge Bernstein*, 86.
Mickle, E. J., and Radó, T. *On upper semicontinuous functions*, 226.
Milkman, J. *Note on the functional equations* $f(xy)=f(x)+f(y)$, $f(x^n)=nf(x)$, 505.
Montgomery, D. *Simply connected homogeneous spaces*, 467.
Morse, A. P. See Hayes, C. A.
Nakayama, T., and Hashimoto, J. *On a problem of G. Birkhoff*, 141.
Nehari, Z. *On bounded analytic functions*, 268.
Newman, M. H. A. *Local connection in locally compact spaces*, 44.
Norris, M. J. *A note on regular and completely regular topological spaces*, 754.
Novák, J. *On a problem of E. Čech*, 211.
Okada, Y. *Some theorems on meromorphic functions*, 246.
Ostrowski, A. M. *Generalization of a theorem of Osgood to the case of continuous approximation*, 648.
Parker, W. V. *On matrices whose characteristic equations are identical*, 464.
Paulson, E. *Some limiting distributions related to the sum of a random number of random variables*, 625.
Peiser, A. M. *Uniform approximations to a class of Bessel functions*, 650.
Popper, P. M. *The algebraic character of a class of harmonic functions in three variables*, 90.
Pinney, E. *The nonlinear differential equation* $y''+p(x)y+cy^{-3}=0$, 681.
Piranian, G. See Erdös, P.
Poor, V. C. *On the two-dimensional derivative of a complex function*, 687.
Prim, R., and Truesdell, C. *A derivation of Zorawski's criterion for permanent vector-lines*, 32.
Rankin, R. A. *The difference between consecutive prime numbers*. IV, 143.
Radó, T. See Mickle, E. J.
Rechard, O. W. *The representation of real numbers*, 674.
Reid, W. T. *A note on the characteristic polynomials of certain matrices*, 584.
Rényi, A. *On a theorem of Erdös and Turán*, 7.
Robertson, M. S. *Applications of a lemma of Fejér to typically-real functions*, 555.
Robinson, J. *General recursive functions*, 703.
Rosenthal, A. See Dietrich, V. E.
Rosser, J. B. *Note on zeros of the Hermite polynomials and weights for Gauss' mechanical quadrature formula*, 388.
Roth, W. E. *On the matric equation* $X^2+AX+SB+C=0$, 586.
Ryser, H. J. *A note on a combinatorial problem*, 422.
Samelson, H. *On Chern's invariant for Riemannian 4-manifolds*, 415.
Santaló, L. A. *On parallel hypersurfaces in the elliptic and hyperbolic n-dimensional space*, 325.
Scherk, P. *On the decomposition of orthogonalities into symmetries*, 481.
Seiden, E. *A theorem in finite projective geometry and an application to statistics*, 282.
Seifert, H. *Closed integral curves in 3-space and isotopic two-dimensional deformations*, 287.
Sengupta, H. M. *On rearrangements of series*, 71.

Shapiro, H. N. *On the number of primes less than or equal x*, 346.
—— *Some remarks on a theorem of Erdös concerning asymptotic density*, 590.
Smiley, M. F. *A remark on a theorem of Marshall Hall*, 342.
Stephens, C. F. *Nonlinear difference equations containing a parameter*, 276.
Sunouchi, G. I. *On double Fourier series*, 522.
—— *On the strong summability of Fourier series*, 526.
Szász, O. *Inequalities concerning ultraspherical polynomials and Bessel functions*, 256.
Szegö, G. *On certain special sets of orthogonal polynomials*, 731.
Tolsted, E. *Limiting values of subharmonic functions*, 636.
Truesdell, C. See Prim, R.
Tsuchikura, T., and Yano, S. *On the absolute convergence of trigonometrical series*, 517.
Utz, W. R. *Unstable homeomorphisms*, 769.
Vinograde, B. *Canonical positive definite matrices under internal linear transformations*, 159.
—— *Note on the escalator method*, 162.
Walters, S. S. *The space H^p with $0<p<1$*, 800.
Wang, H. C. *A problem of P. A. Smith*, 18.
Warschawski, S. E. *On conformal mapping of nearly circular regions*, 562.
Wintner, A. See Hartman, P.
Yano, S. See Tsuchikura, T.
Yood, B. *Transitive systems of linear operators on a Banach space*, 509.
Young, G. S. *On the factors and fiberings of manifolds*, 215.
Zippin, L. *Two-ended topological groups*, 309.
